TO-DAY'S WASHINGTON NEWS. Special Despatches to Evening Telegraph.

PRICE THREE CENTS.]

WASHINGTON, August 11.

Baxter's Fire Zonaves. Baxter's Fire Zonaves have just passed up Fourteenth street to partake of the "Hipernia's" collation. They leave for Philadelphia to-day at noon, and will arrive home to-morrow noon. They are escented this morning by a battalion of the Veteran Reserve Corps, a hand, and a delegation of citizens from Philadelphia and this city.

Army of the Potomac. There is nothing new from the Army of the Potomac this morning. Artillery and picket firing still continues. The present hill in active operations in that quarter will probably continue for several weeks yet.

Mr. Stanton has Not Besigned. The statement transmitted yesterday, to the effect that Secretary Stanton had resigned, was made on what appeared undoubted authority, but both the President and Mr. Stanton, to-day, dony that there is any tru h in the report.

Mr. Fessenden's Return. Private letters received from Mr. Secretary Fessenden make it promable that he will return conter than was at first contemplated. He is looked for about the 15th.

Architectural Alterations. Arrangements are now being made for tearing down the present State Department building and extending the Treasury by the addition of a north front. When completed, this will be one of the largest as it is one of the finest public edifices in the world.

Collector for Montana. Mr. Nathauiel P. Langford has been appointed United States Collector of Internal Revenue for the Territory of Montana, with head marters at Bannock City.

Internal Revenue Decisions. The Commissioner of Internal Revenue has decided that owners or agents of vessels or canal boats do not appear, under section 103, authorized to charge in their freight bills the 24 per cent, tax in addition to the amount agreed upon for freight. The word "fare," in the act, cannot properly be construed to include freight.

The same equity which influenced the enactment in the proviso as to fire would seem to apply equally to freight, and it may have been by accident that the provision in favor of the transporter was not made to include both objects. But we cannot undertake to supply by conjecture omissions in an act of Congress. Fare is an enthely different subject from freight, and cannot be interpreted by any reasonable latitude of construction to include it. The 95th section has no application, and does not cover the difficulty.

IN REGARD TO PUBLIC DOCUMENTS. Public documents printed for the State, which are not sold, but gratultously distributed, are not held to be taxable. CHARCOAL.

While common wood-charcoal and bone-dust are specially exempt from taxation, the animalcharcoal, made from hones, and known and sold as animal-charcoal, is taxable. THE STANDARD TON.

By the act of June 30, 2000 is fixed as the standard ton for purposes of taxation under the Revenue Law .

PUBLISHERS AND BOOK AGENTS. Where a publisher sends an agent to solicit subscriptions for a book which he is about to publish, and afterwards sends out another agent to deliver the books when published, it is necessary that the latter agent should take out a peddler's

Change of Commander in Florida. Brigadier-General William Birney has been relieved from the command of the Florida District by General J. P. Hatch, and ordered to report to General Butler at Fortress Monroe. He will probably be assigned to the command of the colored troops in General Butler's department. General E. E. Potter has been assigned

to the command of the District of Hilton Head. Clothing for three Months' Men. The War Department has decided that the allowance for clothing for three months' men who have served less than that time shall be fixed for the full time of service. The same rule applies to six and nine months' men. The one hundred days' men will be treated in this respect the same as the three months' troops.

Unpaid Requisitions. The amount of napaid requisitions in the Treasury during the past week were reduced eight millions six hundred and thirty-seven thousand dollars.

Treasury Operations. One hundred and thirty-two thousand dollars in fractional currency were issued from the Treaenry last week. Over four millions of the three years seven three-tenths notes were converted into bonds between the 2d and 9th of August.

Expected News from Mobile. The Navy Department has no despatch-best at Mobile, and it is expected that the next advices from Admiral Farragus will be received at New York via New Orleans, with which city he finds means of communication. Letters from the Department are dally addressed to New Orleans for the Admiral.

Recruiting Colored Men. General Patrick has issued orders forbidding recruiting agents from calisting colored men within the flues of the Army of the Potomac.

The New Begister of the Freasury. Goddard V. Colby, of Vermont, was appointed Register of the Treasury to-day, vice the Hon. L. E. Chittenden, resigned. Mr Chitenden has consented to remain in charge of the bureau until his successor returns from Vermont.

Term of Service. An order from the War Department to-day declares that officers of three years organizations, when promoted and recommissioned, must be sworn in for three years, and not for balance be an expired term of regiment or hartalion to which they belong. The spirit of the order applies also to promotions in forces organized for less than three years. This practice has prevalled for some time, but is now first embodied

Officers and Men Exchanged. By command of General Banks all officers and enlisted men, prisoners of war, who were de-

ifvered at Red River Landing, July 22, 1864, to Colonel C. C. Dwight, Commissioner of Exchange, have been declared exchanged. Officers included in this exchange belonging to regiments in the 9th Army Corps, are ordered to report a once to Major-General J. J. Reynolds, to rejoin their regimen's. Those belonging to regiments formerly comprising the 13th Corres, to Briga Her-General T. W. Sherman Communiting Defenses at New Orleans. These officers and enlisted men belonging to organizations whose term of service has expired will at once be transported to their respective States, there to be mustered out, in sectorance with Circular No. 56, War Department May 2, 1804.

ACCIDENT. FULL PARTICULARS OF

THE EVENT.

Special to The Evening Telegraph. Washington, August 11.—The Starsays:—The mail steamer C. Vanderbilt has arrived from City Point, bringing particulars of a terrific explosion at that place on Tuesday morning last. The mail steamer Dictator had just left the wharf, provicentially, when the explosion took place, otherwise the disseter would have been greatly more deplorable in its extent. The explosion took place on board two barges loaded with ordering stores, belonging to the 6th Corps.

Opinions differ as to the cause of the explosion, ome asserting that it was occasioned by one of the workmen dropping a box of amminition, while others contend that it was caused by the sparks from eigurs used by persons on board.

The loss of life was fearful, but when the Finelerbiit left City Point yesterday morning the exact number of killed and wounded had no been ascertained.

Sixty are reported to have been killed ontright. ad between two and three hundred wounded. Heads, arms, and legs of victims, filling twenty-seven sacks, were pitched upon the beach, and the water is said to have been literally filled with limbs and bodies, in every state of distigurement. The 20th New York militia, doing provos

guard duty at City Point, lose five men killed and twenty wounded. Picces of shot and shell were thrown over the

Corps Hospital a mile to the rear of City Point, and parties one hundred yards away from the scene of explosion were killed by the falling of fragments of shell. The keel of one of the barges was thrown up a

hill forty feet high. Most of the buildings at the wharf were demolished, and some four hundred feet of a new warehouse what f destroyed.

The office of the Adams Express Company is a complete wrick, but the employees of the company who were in the building escaped unharmed. A number of officers and men of the Commis-

sary Department are missing, and supposed to have been killed, but their names have not been secrtained. Colonel Bahcock, of General Grant's staff, was slightly wounded, and Dr. Prentiss, of the 73d

New York, had his left foot mashed. Mr. Baxter, sutler at City Point, is

The explosion is said to have shaken the earth for miles around, and for a time caused the greatest consternation.

Many of the buildings on the wharf at City Point are a mass of ruins, and the amount of loss in property will be very heavy. The Vanderbilt brought up several wounded

THE EXPLOSION AT CITY POINT. WASHINGTON, August 11 .- A letter from City Point, dated August 10, says :- About 11 o'clock yesterday, a noise resembling the explosion of a magazine was beard at the headquarters of the Army of the Potomac, and many surmises were indulged in as to the direction from which it

came and its cause. During the afternoon word came that a boat leaded with ammunition had exploded at City Point, causing a frightful loss of life. On the correspondent of the Associated Press reaching the scene of disaster, a spectacle was presented to him utterly indescribable.

Buildings were demolished, tents thrown down and a number of horses killed. The depot build-ing, which had just been completed, was a mass of ruins, while the ground for hundred of yards was covered with property of atmost every de-

The dead and wounded had been extricated from the rains and carried back; the former for burnal and the latter to the hospital.

A boat loaded with various kinds of amountion was being onloaded by the negrous of the Quartermaster's Department, (mearly a hundred in number); and the only theory advanced as to the cause of the clamity is, that a shell must have been dropped by one of them, thus communicating to the entire mass.

GENERAL CANBY TO TAKE THE CITY

Ete., Etc., Etc., Etc., Etc.

Special to The Evening Telegraph. WARRINGTON, August 11.-In view of Farmgut's spierdid success before. Mobile, public expectation has jumped to the conclusion has our oreve are ere this in possession of Mobile. This may be the case if our land forces were able to o-operate with Farragus, but it is not expected y the Navy Department that he will be abo, unsupported by such forces, to take Mobile.

He has probably accomplished all the nary's part of the programme, and has got his vesels into positions from which he can materially aid General Canby's troops in any assault no m the works immediately surrounding the city.

The actual occupation of Mobile is by no neans so desirable as many persons suppass. At present we hold the harbor effectually. Were we to hold the city; also, a considerable garrison would be required there, and much more and co-operation than will suffice merely to keep out every blockade runner.

If it be intended to send expeditions into the nterior from that quarter, then we must take and hold the city; otherwise, according to the R aumond papers, we seem already to have achieved all that is degrable just now.

This Committee consists of Thomas Tasker, Chairman, John W. Frazer, Henry Davis, Joshua Spering, and Dr.

Wm. H. Uhler. The Committee will secure the appointment of five mustering lieutecants, whose labors will be directed towards ulling the quotas of the followdirected tow res mining the greatest defici new :-First ward, quota 917; Second Ward, quota 495; Seventh Word, quota 591; Tenth Ward, quota 406; Fifteenth Ward, quota 690; Nineteen h Ward, quota 619. As soon as the quotas of ince Wards are reduced to an average with he others, then the work of the Committee will be bestowed

m all the Wards alike. The cut zens of these Wards should now go to work, and act with the gentlemen having the matter in charge. Meetings should be called and

matter in charge. Meetings should be called and money liberally subscribed for the payment of the Ward bounty. This latter premium must be paid, or no recruits can be obtained.

It is really surprising that a Ward like the 8-venth, one or the weal hieas in the city, should remain as inactive as it has, when other districts, not half as prosperous, have subscribed large runs and are rapidly illing their quotas. At the last meeting of the Draft Convention this Ward was mut even represented by a delegate. This looks as if the residents of that locality wanted a dualt, and it so, they will certainly be accommodated about the 5th of September next. PRESS CLUR OF PRILADELPHIA,-The "News paper Conven lou" reassembled yesterday after noon in the Select Coun-il Chamber, and proceded to the consideration of the by-laws, which
gave rise to a protracted, interesting, and at
times animated, discussion between Messrs E.
W. C. Greene, Thomas M. Coleman, William H.
Fisher, H. A. Wetherli, J. Hassan, A. W. Frick,
E. C. Wallace, I. W. Wallazz, J. H. Booth, J. R.
Dunlingson, and Dr. Jallos Hines, after which
the by-laws were approved. The Convention
then proceeded to manginate the Ciao. Nominations for membership were made, and each
comince was voted for by the members present.
The meeting adjourned until next Wednesday
afternoon, at which time the balloting will be renamed. The Convention was in session over
four hours. The attendance was large, and in
the transaction of a large amount of business, noon in the Select Coun il Chamber, and pro-

the transaction of a large amount of business, the machinery of the organization was put late complete working order. The "Press Club of Phila cliphia" is now a permanent markurbon of our city. Its influence will soon be relognised and felt by the people. THE TWENTY-POURTH WARD TONNEL .- The work on the West Philadelphia tunnel is prowork on the west Financephia games is progressing rapidly. Up to this morning excavations had been made from the vicinity of Tairtysecond and Liceust streets to the northern side of
Chernut, and have been commactly waited in with
stone. Between Cheshut, and Market the workmen are busily laboring to excavate the bed of
Markon street. The sed below Chernut and
above Market street is of a light clayer nature,
and easily yields to the spade; out between these
two streets is a straining of granter, through which and easily yields to the spade; out between these two streets is a stratum of grants, through which the course of the tunnel must be blast d. The work is consequently one of difficulty and tedious labor. It will be several months yet before all will be completed and the tunnel is ready for use. This is the only work of the kind in Philadelphia, and will be used for the transit of the cars of the Jauction Railroad carrying passongurs between New York and Washington It will be twenty six fest deep and about forty wide. The excavation commences near the Round House in West Philadelphia, continues above around until it in ners Market arrest, where the tracks disappear, emerging about one hundred feat below Chesnut street. The top of the tunnel will be reven seet below the grade of Market street.

COLORED CONFERENCE OF DETAWARD. - Bishop James has just organized the Delaware Conference of colored members, one of those constituted by the recent General Conference held in this city. Agreeably to the appointment of the Episcopal Beard, Bishop Janes men the preachers at Wessey Chapet, Padadelphia, on July 28. After devotional exercises he rescived their papers, and adjourned till the next day. He found ten elders teconomended according to the extension of the figures. Conference of the figures. cording to the order of the General Conferen and declared from the doly organized Delaware Conference of the Methodist Episcopal Courch. During the session one other eider was received, making eleven. Eight practices were received on tilal, seven were ordained decems, and three of this, seven ware ordained detects, and three ordained elders. The work was arranged in three districts, with colored presiding class. Of the stations, two are in Philadelphia, three in New Jersey and the rest in Danware, and the castern shore of Maryland. Twenty-two practices received appointments; some of them are men of decided character, and the prospects of the new Conference are very hopeful.

Conference are very Loperal. A PANTHER STORY .- A few days since the pesceable edizons of Germantown and vicinity were agitated by the report that a panther escaped from a measgerie a few weeks ago, while passing along the Wissahickon turnpike, and is now at large. The child of a boutman is said to have fellen a prey to his carn vorous appetite; and that failen a prey to his carn vorous appetite; and that after nightfall, his cry has been heard issuing from the solitation of the woods. A "reliable person" assert that, greatly to his alarm, the reliable person" assert that, greatly to his alarm, the reliable parsed him on the road, a few evenings ago. Partles, it is said, have been searching for it without success. We "too however, that it will be some time before his males y is capared, or that the mangles mains of human beings and the bearts of the sold will be found, on which he has been feasing.

he has been feasting. RECEUTING .- This morning warrants were issued for the payment of the city hounty to twenty-seven three years men and one twelve month man. It has been supposed by some per-sons that the increased city bounty of four hun-dred dollars would be paid to the principal who furnishes a su stitute, but such is not the fact. Mayor Henry yesterday state I that the in reased county was designed to encourage enlisting, and that he would not sign warrants for it except to volunteers in the service. Those furnishing sub-stitutes will receive, as heretofore, two hundred and fifty do lars. Nine hundred and lifty do lars. were asked for substitutes yesterday, under the belief that the four hundred dollar bounty would

be paid to the principal. THE LATE SANITARY FAIR .- A more desolate spot than Logan square, the site of the lare Saultary Fair buildings, cannot be found in the whole city of Philadelphia at this time. The grass has striven hard to hold its own, but the contest was an unsuccessful one, and nothing now remains but a new rafts of olighted spears to indicate the existence of anything green in the vicinity. Over this scene of desolation the "olig gan" will keeps watch and ward, the oary role of the great exhibition. Tals will soon disappear, as its materials and construction are not calculated to period the summer's heat or the winter's cold.
